Report of lab task 6:

Topic: NLP Fundamentals

## Objective

- To learn tokenization and text chunking.
- To make a simple FAQ chatbot.
- To test text searching.

## Work Done

- Tested different text examples.
- Created a small FAQ chatbot.
- Divided documents into small chunks.
- Tested three chunking methods using TF-IDF.

## Result

- All basic code tests passed.
- Sentence-based chunks gave better development results.
- Search results still need improvement.

**Conclusion:** I learned how text is divided into chunks and how a system searches for useful information.
