Lab 4 Report: A* Search and UCS

Name: Hadia Aslam

Roll No: 051

Objective

- To understand A* Search and UCS.
- To find the shortest path using Python.

Tasks

- Created a graph with path costs.
- Implemented A* and UCS.
- Tested different heuristic values.

Result

Both algorithms worked successfully and calculated the path cost.

Conclusion

I learned how A* and UCS find the best path using Python.
